Norton inquizitive answers quizlet

Visual Guides offer step-by-step illustrations and detailed instructions on how to use Norton Digital Toolkit products effectively. This page guides students through navigating the user interface for completing an InQuizitive assignment from start to finish. Using InQuizitive Assignment For first-time users, it's recommended to complete the "How To Use InQuizitive" assignment before beginning coursework. Clicking on the title will launch the introduction assignment in a new tab. Some instructors may require this assignment as part of their grading criteria. Before starting work, ensure you have joined a Student Set by providing your instructor with a Student Set ID number. If not provided one, click "I don't have a Student Set ID at this time" to proceed. Joining a Student Set allows instructors to view results and save all work. If accessing InQuizitive through an LMS (Blackboard, Canvas, D2L, Moodle, etc.), you might not receive the notification or need to enter a Student Set ID if your instructor uses an LTI connection for reporting grades. Activity Introduction Click the gear icon in the top right corner to access activity tools. This indicates the minimum number of questions needed to complete the activity and receive a grade. Answering more questions can help achieve a desired grade, but answering the minimum ensures submission and grading. The Target Score is defined here: achieving this score yields a 100% grade. You can answer as many questions as you like to reach the Target Score. Click "Show InQuizitive Quickstart Video" to view the video or start answering questions with the "Start Answering Questions" button. Questions Access activity tools by clicking the gear icon in the top right corner. This is the confidence slider, allowing you to make questions worth between 20 and 100 points based on your confidence level. Correct answers gain those points, while incorrect ones result in losing them. You can regain half of lost points by answering correctly on a second attempt (or even third, fourth, or fifth attempts for certain question types). Your Activity Score is displayed here, with a line graph showing progress as you answer questions. There are three levels represented in the graph; click on the box to view the Activity Report. Current Grade is shown below, tracking your progress throughout the assignment. As you progress through the assignment, you'll get an idea of how many more questions you need to complete to earn a grade. You can continue answering questions until you reach your desired grade. If you're having trouble with a question or think one is unfair or incorrect, click on the Question Help/Challenge button for assistance. You can challenge up to three questions per assignment and will receive any lost points back if you succeed. The InQuizitive platform features various types of questions. Make sure to follow each question's directions before moving on. You'll only be able to proceed when each question is fully answered. When answering correctly, you'll see a message confirming your response. You'll also earn points and receive feedback for each question. If your Confidence Slider isn't maxed out and you get multiple correct answers in a row, you might receive a prompt suggesting you increase your confidence level. Additionally, if you answer five questions correctly in a row, you'll earn a 5% bonus based on the Target Score. However, if you answer incorrectly, you'll have the opportunity to try again without losing any points. You can regain half of the lost points by answering correctly on your second attempt for most question types. Keep track of your progress and receive feedback for each question. If you need help or want to review a question, click on the Try Again button. After passing level 2 and level 3 thresholds, your points will remain at or above that threshold from then on. For instance, if reaching level 2 requires 500 points, once you reach it, your total won't drop below 500 again. To see how you're doing, click the "View Report" button for this assignment's activity report. The "Take a Break" button lets you take a pause from answering questions, and the "Back to Questions" button takes you back to them. If you've answered 3/4 of the minimum questions with at least 75% of class average time spent on each, but still haven't reached level 2, InQuizitive will give you a bonus question that bumps you up if answered correctly. The same goes for reaching level 3 after doubling the minimum questions. After completing the required number of questions, your current grade is shown, and you can return to questions to improve it. Once you've submitted your work, a green box with "Your grade has been submitted" appears under your Current Grade; you can continue improving until you reach 100% or the Grades Accepted Until date passes. Reaching 100% lets you close out of InQuizitive and go back to your Assignment List. After reaching the Target Score, your grade stays at 100%, and you can review questions even after the Grades Accepted Until date. However, after this date passes, you can no longer submit or improve your grade. When returning to the Assignment List, it shows the time spent, score, and grade in the table; clicking on the title takes you back to the assignment for further review or improvement. A pool of water had a volume of 612m^3. After calculating its dimensions, it can hold 6.8 elephants with space remaining for each elephant's 90m^3 needs. We are here to give you answers on tricky subjects. Our team provides inquisitive answers that will help you with assignments, tests, and exams. According to Britannica Dictionary, "inquisitive" means wanting to ask questions to learn more about a topic or subject. It's commonly used by instructors to check students' knowledge. The Inquisitive Tool is an online learning tool for educational institutions. Students can use it to master their foundational knowledge in an engaging way. The app assigns quizzes that help students gauge their understanding of topics and improve their skills. Norton Inquisitive is a term used to describe the Norton company's educational resources, including eBooks. It provides access to the Norton Inquisitive app, which offers learning materials and tools for students. Computers, tablets, and smartphones can easily integrate with Norton learning tools like eBooks because the platform is user-friendly. Students like Inquisitive due to its grading method, which lets them gain or lose points based on their answers. The app also allows students to weigh how much they know about a subject by answering questions. Additionally, it gives students confidence that they have an idea about a concept. The platform provides clear explanations of correct answers, even if the student gets it right, helping them learn more. Inquisitive has several benefits, including adaptive technology that makes questions harder or easier based on the student's progress, as well as active and formative feedback. The app also uses gamification elements to engage students and motivate them to improve their memory skills. You'll find the confidence level slider to your right on a computer or at the bottom of a smartphone. When adjusting this slider, increasing your confidence level increases points gained, but also points lost. Slide the ball up to increase confidence, type lowest levels if unsure, and highest for correct answers. Correct responses yield extra points, incorrect ones lead to deducted points. Our services can aid in uncertain situations, reducing unnecessary searches for history. The system has three levels, with half points regained on subsequent attempts. Accumulated points won't drop below a threshold. Having trouble accessing your eBook after purchasing an Inquisitive Access Code? Don't worry, it's not you - just a minor glitch that needs a fix! First, upgrade your purchase by logging into your Norton Learning Tool account and clicking on "purchase options" at the top right corner. From there, select "upgrade purchase" for the eBook and enter your credit information to confirm. Once upgraded, you should have full access to your eBook. If you're still stuck, check out our FAQs below! Can I get Inquisitive answers for free? Nope! Our experts will deliver accurate answers if you place an order with us, saving you time and increasing your chances of better scores. How about getting 100% on Inquisitive all the time? Well, it's possible - just make sure to answer enough questions and reach a certain threshold of points or target score. Want to join a student set on Inquisitive? Easy peasy! If your LMS has integrated Inquisitive, you don't need a student ID number. Otherwise, follow these steps: find the gear icon, add yourself to the student set from the menu, and enter your ID number. Can I skip questions on Inquisitive if I don't know them? Nope again! The platform gives you hints to help you think and try again until you get it right. And yes, you can use a screen reader on this app - we've got various features for users, including screen-reader accessibility, full keyboard, and multi-modal feedback. Inquisitive tool has been super helpful in motivating students to learn in different ways. Whether used as a standalone or integrated with other LMS, institutions have seen great benefits - even a major boost in low-performing student departments! So, follow these guidelines to get the most out of Inquisitive and ace those assignments! If u have problems whilst usin or searchin for Inquizitive ansers in chapters 1,2 & 3 then dont worry we r here to help our professionals tutors are allays happy to assist u contact them and we wil provide u with the accurate ansers you need to succeed
